Summary of qualifications & assets

I am a Postdoctoral Associate in the flexLab at EPFL.

My current research involves aspects of fluid-structure interactions relevant to the understanding of the behavior of porous wings at low Reynolds numbers. I also keep an interest on the theoretical and applied mechanics of thin shells. I work among solid mechanics, fluid mechanics, and differential geometry and I am interested in analytical, numerical, and experimental methods.

I am a member of the Italian Research Group in Mathematical Physics (GNFM) and the American Physical Society (APS).

Experience

Nov 2017 – currently	Postdoctoral Associate at École Polytechnique Fédérale de Lausanne Supervisor: Prof. Pedro M. Reis
Nov 2015 – Oct 2017	Postdoctoral Associate at Boston University Supervisor: Prof. Douglas P. Holmes

Education

February 2016	Ph.D. in Theoretical and Applied Mechanics, Sapienza - Università di Roma with honors Focus: Morphing of Thin Soft Structures Driven by Geometry and Swelling Advisor: Prof. Paola Nardinocchi
Aug – Dec 2014	Visiting Scholar at Boston University Advisor: Prof. Douglas P. Holmes
October 2012	M.Sc. in Space Engineering, Sapienza - Università di Roma 110/110 cum laude Thesis: "On the control of the large deformations occurring in IPMCs" Advisor: Prof. Paola Nardinocchi
October 2010	B.Sc. in Aerospace Engineering, Sapienza - Università di Roma 110/110 cum laude Thesis: "Bending deformations in ionic polymer metal composites induced by mechano-electro-chemical interactions" Advisor: Prof. Paola Nardinocchi
